**NuageProduction™ specializes in mobile channel consulting and mobile solutions development.**

Specializing in innovative communication technologies, and having delivered solutions across more than 127 countries, NuageProduction™ is your creative and experienced partner for the development of multi-platform mobile applications for iOS, Android, BlackBerry, and Windows Phone.

Our teams deliver the senior project management, security, language localization and integration with other systems that your mobile solutions require. And our efforts to continually deliver innovations, with 5 international mobile technology patents to date and others in process, will give you the confidence that we can help you to create unique and cutting edge solutions in this fast changing technological environment.

Our key strengths cover extensive process mapping, key differentiators, design, ad-hoc applications, monetization of content, augmented reality, and Media applications.

With more than 140 projects either delivered or in process, we have become the premier provider of multiplatform mobile applications for companies of all sizes.

- NuageProduction™ made the 66 Radio France applications on iOS, Android, BlackBerry, Windows, and Mac OS X, with over 4 million downloads, covering the infrastructure needs, design, human interface, streaming, news, sound and video.
- NuageProduction™ made the iOS applications for [Adforum.com](http://Adforum.com)
