UltraPak® with SpikeRight® PLUS Port

New enteral-port cross design on UltraPak closed systems is only compatible with the new SpikeRight PLUS proximal-end connector, further reducing risk of misconnection.

FIRST COMMERCIALY AVAILABLE PROXIMAL-END ENTERAL CONNECTION SYSTEM DESIGNED TO BE INCOMPATIBLE WITH:

- IV ports and spikes
- Universal spikes
- Former SpikeRight connectors

CLOSED SYSTEM SAVES TIME, REDUCES CONTAMINATION RISK

- Up to 85% less preparation time compared with open systems using powder and cans
- The UltraPak system reduces the risk of contamination due to non-air-dependent closed system
- Fewer feeding bag and administration set changes
- Less staff time to manage feedings

The SpikeRight connector system: A heritage of safety since 1994

- Uniquely designed to reduce the risk of dangerous tubing misconnections
- Used by 9,400 healthcare organizations/facilities in the US
- 270 million products purchased
- The standard among major European manufacturers
New SpikeRight® PLUS proximal-end connector design lowers the risk of tubing misconnection

Nestlé is committed to supporting institutions during the transition to the new enteral closed-system product line and will make available conversion tools, in-service programs, and adapters shown above.

Covidien systems are compatible with SpikeRight PLUS.
