

# THE EV EXPERIENCE

A silent ride. Strong acceleration. The satisfaction of knowing you never have to stop for gas again. There are a lot of reasons to get behind the wheel of an EV.

*When you become an EV owner, you experience the freedom of less maintenance, lower operating costs and more money in your pocket. Not to mention how fun EVs are to drive.*

Be free.

## BEHIND THE WHEEL

Once you turn one on, you'll immediately notice the silence. Once you pull away, you'll notice the quick acceleration. What you won't notice is the smell of gasoline. And don't worry, your memories of oil changes every 3,000 miles and transmission repairs will begin to fade from your mind as you'll never need either again.

### Lively performance

You'll also discover that driving an EV is very similar to driving the gasoline-powered and diesel cars and trucks you're used to. You don't sacrifice performance. In fact, since EVs deliver 100 percent torque at zero rpm, you may find them to be quicker from a stop than what you're driving now.

### Fewer emissions

You'll enjoy knowing you're contributing something toward a healthier environment. EVs as a group produce lower overall emissions than gas-powered vehicles even when electricity comes from fossil fuel generation. Full battery electric vehicles reduce tailpipe emissions to zero.

### Saving on operating costs

You'll also start saving on operating costs. EVs are significantly less expensive to operate and maintain than gas-powered vehicles. And you can begin to help America keep its money at home rather than sending roughly a billion dollars a day overseas for oil.

Doing the right thing for the planet, the nation and your wallet is as simple as getting in the habit of plugging in an EV every day, and then sitting back and enjoying the responsible, fun ride.

*Driving an EV isn't just about saving money on gas. You'll also save time with less required maintenance and help the environment with fewer emissions.*

### NRG EV Services
