

Making Life Better Around the World

At SC Johnson, we're working to make green choices and do what's right for future generations. Here are just a few recent examples.

products

wind

philanthropy

recycling

disease prevention

volunteerism

biofuel

solar

Racine, Wisconsin

New wind turbines enable production of 100% of electrical energy for factory on site.

Racine, Wisconsin

Community reading program helped local kids read 1.8 million books in a school year.

France

Company volunteers helped with the local Special Olympics.

The Netherlands

First company-owned wind turbine now prevents about 2,100 metric tons of GHGs a year.

Shanghai

Solar projects provide hot water heating and reduce GHG emissions by 70 metric tons per year.

United States

New concentrated cleaner refills offer low-waste cleaning option and drive dialogue about refills.

United States

Green Choices Recycling Challenge engaged 50 communities to increase their recycling rates within six months.

Italy

More than \$125,000 donated to the Italian League for the fight against cancer.

India

Company volunteers helped distribute books at a new children's library.

Ghana

Pilot program is exploring a new business model to bring repellents and insecticides to rural families.

Rwanda

Collaboration with USAID and The Borlaug Institute continues helping farmers increase incomes and standards of living.

Surabaya, Indonesia

New biofuel initiative uses rice grains as a fuel source to heat water for production.

Mexico

Company volunteers helped with a reforestation project to preserve a habitat for Monarch butterflies.

Argentina

Partnership with Walmart driving environmental education for elementary students.

Latin America, Africa, Asia

Consumer education campaigns raise awareness of malaria and dengue, and prevention measures in 15 countries.
