

Now Available: Auvi-Q™ (epinephrine injection, USP) 0.15mg/0.3mg Auto-injectors

Auvi-Q™

epinephrine injection, USP
0.15 mg/0.3 mg auto-injectors

Auvi-Q is the **first-and-only compact** epinephrine auto-injector with **audio and visual cues** that guide patients and caregivers step-by-step through the injection process during a life-threatening allergic reaction. Auvi-Q is **easy-to-use**, is the **size and shape of a credit card and the thickness of a smart phone, and fits comfortably in a pocket or small purse**. Auvi-Q is indicated for the emergency treatment of life-threatening allergic reactions, or anaphylaxis, in people who are at risk for or who have a history of these reactions.

Auvi-Q contains **epinephrine, a well-established, first-line treatment** for severe, life threatening allergic reactions. Anaphylaxis, a serious allergic reaction that happens quickly and may cause death, can occur as a result of exposure to foods, such as peanuts, tree nuts, fish, shellfish, dairy, eggs, soy and wheat; insect bites; latex and medication, among other allergens.

Auvi-Q Features

- Auvi-Q's breakthrough design features include:
 - **Audio and visual cues** that guide users through the injection process. This includes voice-guided instructions with alert lights that signal when the injection is complete.
 - **Unique compact size and shape**. Auvi-Q is 3 ½ inches tall, 2 inches wide and a half inch thick.
 - **Press-and-hold action with 5-second hold time**
 - **Retractable Needle Mechanism** designed to help prevent accidental needle sticks. Users will not see the needle before, during or after administration.

Auvi-Q should only be injected into your outer thigh. Do not inject into buttock or intravenously.

How To Get Auvi-Q

- Auvi-Q is available by prescription in two dosage strengths:
 - Auvi-Q 0.3mg is intended for patients who weigh 66 pounds or more
 - Auvi-Q 0.15mg is intended for patients who weigh 33 – 66 pounds
 - Studies in pediatric patients weighing less than 15kg (33 lbs) have not been conducted
- Each prescription contains two 0.3mg or 0.15mg single-dose devices and a training device. The training device, which does not contain a needle or medicine, is designed to familiarize patients and caregivers with how to use Auvi-Q in an allergic emergency.
- It is recommended that patients at risk for anaphylaxis carry two doses of epinephrine with them all of the time. More than two sequential doses of epinephrine should only be administered under direct medical supervision.
- Always seek immediate medical attention after Auvi-Q has been administered

Indication

Auvi-Q™ (epinephrine injection, USP) is used to treat life-threatening allergic reactions (anaphylaxis) in people who are at risk for or have a history of these reactions.

Important Safety Information

Auvi-Q is for immediate self (or caregiver) administration and does not take the place of emergency medical care. Seek immediate medical treatment after use.

Each Auvi-Q contains a single dose of epinephrine. **Auvi-Q should only be injected into your outer thigh.** DO NOT INJECT INTO BUTTOCK OR INTRAVENOUSLY. If you accidentally inject Auvi-Q into any other part of your body, seek immediate medical treatment. Epinephrine should be used with caution if you have heart disease or are taking certain medicines that can cause heart-related (cardiac) symptoms.

If you take certain medicines, you may develop serious life-threatening side effects from epinephrine. Be sure to tell your doctor all the medicines you take, especially medicines for asthma. Side effects may be increased in patients with certain medical conditions, or who take certain medicines. These include asthma, allergies, depression, thyroid disease, Parkinson's disease, diabetes, high blood pressure, and heart disease.

The most common side effects may include increase in heart rate, stronger or irregular heartbeat, sweating, nausea and vomiting, difficulty breathing, paleness, dizziness, weakness or shakiness, headache, apprehension, nervousness, or anxiety. These side effects go away quickly, especially if you rest.

Talk to your healthcare professional to see if Auvi-Q is right for you.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
