

PRESS RELEASE

GROHE Minta Touch – cleanliness at your fingertips

New line of kitchen faucets simplifies daily kitchen chores

Ushering in a new era of convenience around the kitchen sink, Minta Touch from GROHE is unique in that it can be operated in two different ways. Being a touch-sensitive faucet, it can be operated simply by touching the spout or the faucet body. This highly hygienic, extremely reliable and impressively water-saving way of drawing water is made possible by the innovative EasyTouch technology. At the same time, Minta Touch can also be operated using its conventional lever. The bottom line: a hybrid faucet offering an all-new level of everyday convenience.

Available with an elegant C-shaped spout with extensible spray or with a stylish L-shaped spout with extensible mousseur, GROHE Minta Touch delivers a perfect flow of water in any situation. Dirty, greasy, sticky or messy fingers? No problem at all – a light touch with the back of your hand, wrist or lower arm is all it takes. This way the faucet and the rest of the kitchen are sure to stay clean and uncontaminated. With your hands clean, the faucet can also be operated using the ergonomic lever which benefits from GROHE SilkMove® technology for precise and comfortable handling.

Minta Touch is perfectly child proof as well. Its EasyTouch functionality rules out the risk of scalding, given that it releases only the cold water flow. Users who do not want to do without warm water can add the Grohtherm Micro upgrade which features a customisable temperature preset function while at the same time ensuring 100 percent protection against scalding.

Pure Freude an Wasser

The advanced functionality of GROHE Minta Touch is complemented by its aesthetics. The GROHE StarLight® chrome plating process ensures that the finish will stay brilliant and soil-repellent for many years to come. In addition, the tall spouts make light work of filling tall pots and vases. This latest incarnation of Minta once again demonstrates the enormous potential inherent in this successful line of kitchen faucets.

GROHE Minta Touch – the next level of convenience at your fingertips.
