**A Closer Look at Kubota Tractor Corporation's
All-New, Next Generation RTV X-Series**

RTV X-Series 100-Word Description:

The Kubota RTV X-Series is the next generation lineup of diesel work utility vehicles. With enhanced styling and ergonomics, the RTV-X900, X1120D, and the X1100C all feature superior ride and terrainability, delivering a whole new level of operator comfort and driving performance. At the core are Kubota diesel engines and VHT-X hydraulic transmissions, a powertrain combination that has garnered a world-wide reputation for

dependable performance. Since 2004, Kubota RTVs have been the best-selling diesel utility vehicles in North America, according to Power Products Marketing's *North American Utility Vehicle Report*. For more information on the all-new line of Kubota RTV X-Series, visit www.kubota.com.

Kubota RTV-X900 – The RTV-X900 is equipped with a powerful 21.6 HP diesel engine, standard 4wd and standard hydraulic power steering for exceptional comfort and control. The two-speed in-line shift allows the operator to maintain better control and shift less often, with two forward speeds – high and low – as well as neutral and reverse. The steel-structured frame insulates the operator from outside noise and vibrations, and front and rear independent suspension offers a smoother, more enjoyable ride even on rough terrain or when carrying heavy cargo. With standard 2 in. hitch receivers at the front and back, the X1120D has a 1,300

lb.-towing capacity. The heavy-duty, hydraulic-lift steel cargo dumping box can carry up to a half ton (1,102 lbs.) and comes with a factory-option, spray-on bed liner to protect the cargo bed from dirt and damage.

Kubota RTV-X1120D – From its proven 24.8 HP diesel engine and higher ground speed of up to 29 mph to its blue-tinted halogen headlights and attention-grabbing polished alloy wheels, the RTV-X1120D is Kubota's new deluxe model that offers a step up in power, comfort and style. The responsive hydrostatic power steering offers more personalized comfort with a tilt-feature.

Kubota RTV-X1100C – Completing the lineup is the all-weather RTV-X1100C, offering a quiet, factory-installed, fully-enclosed unibody cab that features a powerful heating and air conditioning system. The lightweight unit has two large roll-down windows, is nearly airtight, low noise and is virtually rattle-free for a smoother, quieter ride that raises the bar on comfort, convenience and performance. The X1100C is also pre-wired with an antenna and two speakers for easy and efficient installation of an optional radio. Engineered for safety, the X1100C cab, as well as all other RTV X-Series models, meets SAE J2194 and OSHA 1928 ROPS standards.
