

# Rolaids®

Rolaids® is the iconic over-the-counter brand that relieves heartburn and acid indigestion. Re-introduced by Chattem, Inc. in 2013, it's the brand that answers the question *How Do You Spell Relief?*:

- Available in popular tablets and a liquid form – a first for the brand
- Features two powerful antacid ingredients, calcium carbonate and magnesium hydroxide, which contain essential minerals for the body
- Works to safely relieve breakthrough heartburn symptoms for people taking Proton Pump Inhibitors (PPIs) or Histamine H2-receptor antagonists (H2 Blockers)

## Rolaids Returns Home

Chattem's acquisition of Rolaids in early 2013 returned the brand to its original roots. In a sense the Rolaids brand is coming home. In 1953 Dr. Irvine W. Grote patented one of the active ingredients used in the original Rolaids formulation while serving as the head of the chemistry department at what is now the University of Tennessee, Chattanooga. When Warner-Lambert launched the Rolaids brand in 1954, one of the patented active ingredients was supplied to them by the Chattanooga Medicine Company, which is now Chattem.

## About Heartburn

Heartburn occurs when the opening between the stomach and esophagus malfunctions and allows stomach acid to enter the esophagus. The primary symptom of heartburn is a painful, burning sensation in the chest. More than two-thirds (68%) of all U.S. adults experience heartburn at least once per month. In fact, more than 16 million consumers enter the gastrointestinal (GI) category each year of which 74% are on an antacid.
