

About Blu Homes

Blu Homes (www.bluhomes.com) is the leading provider of premium prefab homes in North America. Designed in California and built in half the time of conventional custom homes, Blu homes feature soaring ceilings, walls of glass 'letting the outdoors in', luxury quality finishes, and integrated high performance technologies for convenient and comfortable living. Blu's proprietary information technology enables customers to create their unique home design online in 3-D, and receive a clear, fixed price. Skilled craftsmanship and unique steel-reinforced building technology allow Blu to build beautiful, open-plan designs, ship them efficiently and complete them quickly for a simple one-stop process for its customers.

Built in its 250,000-square-foot state-of-the-art manufacturing facility in Northern California, Blu's inspired and nationally recognized products can be found from New York to the Colorado Mountains and the Pacific Coast. Visit www.bluhomes.com.
