The ACCU-CHEK® Aviva Expert system

The first and only stand-alone meter with a built-in insulin calculator

ACCU-CHEK Aviva Expert Gives Patients Confidence and Control

• First and only stand-alone blood glucose meter with a built-in bolus calculator, the proprietary ACCU-CHEK Bolus Advisor

• Simplifies complex calculations to deliver precise dosing advice and a healthy dose of confidence that patients have calculated it right

• Only 3 simple steps to receive bolus advice, so it’s easy to use

• A simple distribution process

In a survey of ACCU-CHEK Aviva Expert users, 79% reported increased confidence with insulin dose calculation.¹

ACCU-CHEK Aviva Expert Key Features

• Easy-to-read color display

• Electronic diary with option to add:
  - Basal insulin
  - Bolus insulin
  - Carbs consumed
  - Health events

• On-the-go data analysis via trend, target, and average graphs and easy-to-understand charts that help support appropriate therapy adaptation

• Meal and correction insulin bolus recommendations based upon
  - Current blood glucose value
  - Planned carbohydrate intake
  - Patient-specific therapy parameters (e.g., individual insulin-to-carb ratio)

• Recommended amount of carbohydrate intake (meal or snack size) and/or a reduced insulin dose if the blood glucose level is in a predefined hypoglycemic range

• Data transfer through ACCU-CHEK 360° software or ACCU-CHEK Smart Pix device reader

• Uses ACCU-CHEK Aviva Plus test strips, featuring advanced accuracy

Personalized Bolus Advice Settings That Match the User’s Lifestyle

• Customizable health events
  - Exercise
  - Illness
  - Stress
  - Premenstrual

• Preset and customizable alerts

• Customizable time blocks

Receiving Bolus Advice Is As Easy As 1-2-3

1) Test and receive blood sugar results
2) Enter carb data and receive insulin dose advice
3) Inject recommended dose and confirm on meter that advice has been followed
