

# Life Tracker 1

by  Pivotal Living™

## About Life Tracker 1

The Life Tracker 1 is an affordable health and wellness wearable. Working in conjunction with the Pivotal Living mobile app, the Life Tracker 1 uses sensor technology to track daily activities, such as steps walked, daily activity, calories burned, and the amount (and quality) of sleep. The wristband sends information wirelessly to the Pivotal Living mobile app to provide real-time health and wellness reporting to help make smarter lifestyle choices.

## Intuitive Screen

Toggle between Active and Sleep modes or cycle through daily progress on the Life Tracker 1's intuitive OLED display screen with the press of a single button:

- Calories Burned
- Steps
- Distance
- Percentage of Step Goals
- Time of Day

## Sensors & Motors

While the Life Tracker 1 captures basic stats on user's activity, the Pivotal Living mobile app uses an activity sensor found inside most smartphones to reconcile data received from the band. It's this process of corroborating the data that helps ensure a higher degree of accuracy. The Life Tracker 1 measures daily activities by using a three-axis accelerometer to track:

- Active Time
- Calories Burned
- Distance
- Sleep Length
- Sleep Quality
- Total Steps

## Memory

The Life Tracker 1 holds detailed information for the most recent three days, and the Pivotal Living app holds member's historical data (from the day they activate). Sync the Life Tracker 1 regularly to have the most detailed data available to view in the Pivotal Living app.

## Sizing

The Life Tracker 1 is a unisex design and optimal for wrist sizes 6 to 7  $\frac{3}{4}$  inches in circumference.

## Sync

Manually sync the Life Tracker 1 with the Pivotal Living mobile app wirelessly.

## Batteries & Power

The Life Tracker 1 comes equipped with a rechargeable lithium-polymer battery. Clip the supplied USB charging cable to the Life Tracker 1, and connect it to a USB port to begin charging the device. The Life Tracker 1 will recharge to full power in less than 60 minutes, and the battery level is displayed directly on the home screen of the device. The Life Tracker 1 uses low energy tracking to save phone battery life during syncs and can last 5-7 days without needing a charge, depending on usage.

## Colors

Always on trend and in style, the Life Tracker 1 will be available in sleek black, with additional colors to be announced soon.

<b>Environmental Factors</b>	The Life Tracker 1 is water resistant, sweat proof and rain proof. The band is designed to protect against the elements, including warm temperatures, direct light exposure and the occasional dust storm. Just like a smart phone and other mobile devices, it is not recommended to expose the band to wet conditions for long periods of time, such as wearing it in the shower, submerging it in water, or letting it free float in a fish tank.
<b>Availability</b>	The Pivotal Living app can ordered for Android (4.3+ and above) and iOS (8.0 and above) for an annual \$12 membership. Orders placed before Dec. 10 will receive their corresponding Life Tracker 1 bands in time for the 2014 holidays. Visit <a href="http://www.PivotalLiving.com">www.PivotalLiving.com</a> for more information.
<b>Warranty</b>	The Life Tracker 1 includes a one-year limited warranty.
