## Testing the world's strongest gift wrap!

Page: 1/1

Tinglev, Denmark: Millions of Christmas presents are transported in containers around the world. At MCI we build containers and test them to the limit. In fact, MCI engineers occasionally devise some unconventionally tough tests. Only after these tests do we know for sure our containers can be entrusted with your holiday food and gifts. Our mission is to build the sturdiest gift wrap around.

Click at this link to see MCI engineers have fun with a container test: [http://youtu.be/-7O2C\\_b55eU](http://youtu.be/-7O2C_b55eU) The film was made in cooperation with The Discovery Channel. Happy holidays!
