CARD TYPES

DIGITAL GIFT CARDS

Digital gift cards, or eGift cards, are delivered as a secure link within an email. Clicking the link opens the gift card in a web browser (when viewed from a smartphone, the digital gift card is mobile optimized). Each brand has specific redemption instructions, but generally, to redeem in store consumers print the gift card or display it from their smartphone. To redeem online, consumers enter the gift card number and PIN (if applicable) at checkout. Note that prepaid debit cards and reward cards are only available in physical format.
