

Kim LaFreniere, Ph.D.

Kim LaFreniere, Ph.D., is an Associate Research Fellow for Research and Development (R&D) with Clorox Healthcare where she is part of a team that is continually innovating to develop new technologies and product offerings as part of Clorox's more than 100 years of expertise in public health and evidence-based solutions.

Dr. LaFreniere has many years of experience in healthcare product development and clinical expertise in infection prevention and control, skin antisepsis and environmental hygiene. She has published several articles in the area of environmental hygiene and skin antisepsis.

Prior to joining the Clorox Company in 2008, Dr. LaFreniere spent more than ten years in R&D in the consumer packaged goods industry and ten years as technical manager in the analytical services industry.

Dr. LaFreniere is a Michigan native and holds a doctorate degree in Analytical Chemistry from Iowa State University and a bachelor's degree in Chemistry from the University of Michigan. She is also an active member of the industry associations that advocate on behalf of infection prevention and control professionals, from the Association for Professionals in Infection Control and Epidemiology (APIC) and the Association of periOperative Registered Nurses (AORN) to the Michigan Society for Infection Prevention and Control.
