EYES TO THE WORLD

BIONIC 12MP DUAL LENS CAMERA

Let Honor 8 be your window on the world, with a second-generation 12MP dual camera system designed to help you create amazing images. Featuring one RGB and one monochrome sensor and 1.25 μm pixel size, Honor 8's dual lenses capture three times more light than a single lens, increasing picture quality, and producing more vivid colors and crisper details, even in dim or low light situations. Honor 8's cameras offer other advanced features to help improve your photography experience:

- Get high quality images with better focus. Honor 8's hybrid auto-focus aligns using laser focus for short range, precise depth focus for longer range and contrast focus to make true creativity possible. The built-in ISP is aligned with the depth measurement ISP to improve focus and processing speeds.
- Get more creative. Wide aperture mode enables you to blur backgrounds from F0.95 to F16, and even allows you to refine focus after the picture is taken. Professional mode allows full manual control of the Honor 8's camera, so you can get creative.
- Get the best selfies. With an 8MP front-facing camera, the Honor 8 helps you achieve superior selfies even in low light.

PRECISION CRAFTSMANSHIP DELIVERS UNIQUE DESIGN & LIGHT REFLECTION

Stand out from the crowd with Honor 8 smartphone. Beautifully crafted with a glass surface surrounded by a diamond-cut aluminum alloy frame and ultra-narrow bezel, the Honor 8 delivers a smooth and refined finish to the touch.

Precision craftsmanship is evident throughout, from smooth curves and seamless transitions, to the 15-layer surface, carefully manufactured to reflect light in a unique, aurora-like design.

VERSATILE FINGERPRINT AND TOUCH

Honor 8's fingerprint reader redefines what's possible with 0.4-second phone unlock and 3D fingerprint scanning for increased speed and security. The fingerprint reader is designed as a programmable press key, with custom smart key options that assign functions for apps and authorizing mobile payments. In addition, Honor 8 offers NFC, P2P transfers, and SIM/HCE-based mobile payment, for added convenience.

PERFORMANCE DRIVEN

Honor 8 runs Android™ 6.0 and Huawei's Emotion UI 4.1. Underneath its sleek exterior, Honor 8 is powered by a 16 nanometer Kirin 950 chip that reduces power consumption and enhances overall performance. With 4GB of LPDDR4 RAM and external memory support up to 128GB, you get smooth and seamless multitasking and gaming.

The i5 intelligent co-processor manages the sensors, working with the Kirin 950 SoC chipset to provide increased response times and battery life. Featuring

a 3000mAh battery*, Honor 8's Smart Power 4.0 protocols maximize stand-by for almost two days with normal usage or 10 hours of offline video bingeing.**

- Using the factory-provided charger, take advantage of 9V/2A fast charging technology and achieve a 50% charge in about 30 minutes.***

*3000mAh for typical rate, 2900mAh for rated rate

** Data based on Honor laboratory tests, actual times may vary.

***Honor 8 only supports 9V2A charging when used with the factory-provided charger. Charging times may vary depending on the charger used and the ambient conditions.

COMPLETELY CONNECTED

Always get the best connection with Honor 8. It's built with the best possible cell mast to ensure quality reception and features smart dual-band Wi-Fi switching across 2.4/5 GHz bands. Honor 8 will default to the faster 5 GHz band unless 2.4 GHz signal is stronger, ensuring you are completely connected, completely confident wherever you roam.

ALL-IN ENTERTAINMENT

Honor offers exceptional sight and sound in a smartphone. Its 5.2-inch FHD display delivers beautiful images and video with 96% high color gamut, color

enhancement and dynamic pixel-level contrast adjustment technology. With a high-gain microphone, voice+ technology and volume amplification features, everything sounds better on the Honor 8—including calls.

- Integrated speaker unit: Honor 8 features an integrated speaker unit that provides high-quality music playback.
- Smart Control 4.0: Honor 8 includes a separate infrared module with built-in IR codes for popular products, allowing you to control devices even without an Internet connection. Honor 8 supports 232,740 products from 5810 brands, with an impressive 99% accuracy rating.
