Experience Connected Convenience

Honeywell Vector Occupant App

Mobile Apps

Integrating the Intelligent Building

As building managers are faced with more complex facilities and increasing occupant expectations, the need for smarter buildings and work environments continues to grow. The world is becoming more connected due to the exponential growth of the cloud and big data which creates opportunities to maximize building efficiencies and to attract a talented, motivated workforce by offering a connected worker experience. Through the power of the IoT universe, mobile apps from Honeywell enable advanced data capture and analysis to promote safer, more comfortable, efficient and interactive work spaces.

## Fueling the growth of Connected Buildings

Internet of Things (IoT)
50 Billion devices

Honeywell Vector Occupant App

The Honeywell Vector Occupant App connects building occupants to their workplaces to promote safety, productivity and optimize the occupant experience. Smartphones can be used to unlock access controlled doors, to raise requests to indicate discomfort with temperature in workspaces, and to use photo ID in digital format. The Vector Occupant App is supported by a cloud-based infrastructure and a rich collection of analytics to help increase efficiency and cost effectiveness of building operations. Available for iOS and Android devices.

Download on the App Store

ANDROID APP ON Google play

Available in the Apple App Store. Runs on iPhone 5S or later with iOS 9.X. Also available for Android in the Google Play Store. Runs on Nexus 5 and Samsung S6 / Note 5 devices with OS version 5.1 & 6.0. Also available to developers for customization.

Your Building, at Your Service
Cloud Connectivity and Mobility Promote Real Outcomes

The connected occupant app simplifies the life of a building manager via a cloud and mobile infrastructure.

- Deploys higher security mobile credentials faster and easier
- Issues digital photo ID in seconds with no printing and no long lines
- Uses data from raised hot/cold calls to better manage building temperature
- Increases building security by controlling proxy access – most employees will not share their phones, but they do share their access cards
- Deploys a scalable solution in a single building or across multiple locations

One device, one app, many ways to enhance the occupant experience
More Secure Work Environment
- Use smartphone to unlock doors from a distance
- Digital Photo ID – clear and current photo ID on user's phone
- Solution to forgotten access cards

Improved Building Operational Efficiency
- Easier, faster way to raise hot/cold calls with feedback
- System knows automatically where requests come from
- Facility managers can quickly respond to occupant requests

Create an exceptional experience for occupants and building managers – contact Honeywell today.
