Miele Blizzard CX1 – The First Bagless Vacuum from Miele

Design

The first bagless vacuum cleaner from Miele boasts excellent cleaning performance and exceptionally convenient and hygienic disposal of dirt and dust. The Vortex Technology and an innovative filtration system are just some of the intricate details that set the Blizzard apart from competitors in the category.

Innovative Vortex Technology

Most bagless vacuums feature a cyclone technology that requires air to travel in many different directions, resulting in wasted power and creating high noise levels.

The Blizzard CX1 features Vortex Technology, where air passes through one single, large cyclone. This provides quiet, powerful and convenient cleaning performance, with four power settings that can be easily controlled.

Hygienic Emptying and Filtration

The Blizzard CX1 sets a new standard of convenient hygiene with its innovative three stage filtration system:

1. Coarse particles are separated from fine dust, with fine dust retained by the pleated Gore® CleanStream® fine dust filter.
2. The filter's sensor-controlled ComfortClean self-cleaning system ensures constant air flow, meaning dust release is considerably reduced when emptying and cleaning the filter.
3. The Blizzard's HEPA filter catches even the smallest particles and allergens, ensuring that air discharged from the machine is cleaner than ambient room air.

Miele Pricing: starting at \$699

Blizzard CX1 Bagless Vacuum

Miele

FEATURES

KEY BENEFITS

- User Convenience**
- Eco Comfort handle with integrated dusting brush*
 - Silence System
 - Stainless-steel telescopic tube
 - Park System for breaks in vacuuming
 - Park System for storage
 - Comfort cable rewind
 - Integrated accessories

- Mobility**
- Floor-friendly swivel castors with steel axle
 - DynamicDrive/4-point steering*
 - 10 m operating radius

- Maintenance**
- The Blizzard CX1 is relatively maintenance free
The dust container is emptied with the easy click of a button.
The Gore CleanStream fine dust filter should be cleaned approximately once or twice a year with a simple rinse under regular tap water.

- Reliability**
- Like all other vacuum cleaners from Miele, the Blizzard is tested to last the equivalent of 20 years, based on 45 minutes of vacuuming a week and 5,000 disposal cycles
