

Watch 4,000 shifts fill up in less than 4-mins

We've innovated the hourly workforce model for your business

MyWorkChoice creates flexibility for the hourly workforce within your current operational model and established work hours. Utilizing full shifts, half shifts and, most importantly, days off when they choose, we developed a new way to work for hourly employees. We build a community of workers who select desired shifts from a smartphone app then we manage the entire process for you, ensuring it's completely turnkey. We virtually, quickly and safely hire a dependable workforce that can be mobilized in a matter of minutes... 4-minutes to be exact. Each Friday we post more than 4,000 shifts for any individual client and watch them fill up in less than 4-minutes.

Of course you have 24/7, real-time visibility to workers via a customized dashboard so you can watch your shifts fill up too. Check out the difference MyWorkChoice can make for your your business. Get a demo today: www.myworkchoice.com/demo

INTRODUCING: COVID-19 Risk Management Module™

Monitor exposure & automatically backfill with a healthy worker

Keeping workers and the plant COVID-free is important to everyone. To assist, we developed a Real-time Risk Management Module™ for our app. MyWorkChoice can proactively screen the health of your entire workforce **before they enter the building**. We alert you to at-risk employees then automatically backfill hourly employees with a healthy worker. This keeps the workforce safe and production at full capacity.

How it Works

Identify employee patterns

We input your hourly workers onto the MyWorkChoice app to understand absenteeism patterns—by position and by shift

Build a community

Based on current hourly absenteeism rates, we build the perfectly-sized community enabling 95% shift fill rates

Recruit, hire & schedule

MyWorkChoice virtually recruits, hires & schedules your custom W-2 worker community. **Our clients have \$0 overtime costs**

24/7 real-time dashboard

Achieve 24/7 real-time access to hourly workers who are clocked-in, as well as a host of additional analytics to effectively manage your team

Employee star rankings

At the end of each week, supervisors can rate the performance of hourly workers
