

Hyundai Tucson

The most standard and available safety features in its class.

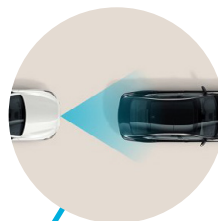

Tucson offers excellent active and passive safety systems, with an array of advanced safety technologies as part of the Hyundai SmartSense Safety Feature suite.

Advanced Driver Assistance Systems

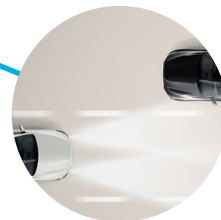

SUV buyers do not want to compromise when it comes to protecting their passengers. Tucson offers more features than any other compact SUV on the market. This generous suite of advanced safety features goes beyond the standard safety equipment on the market, and includes many innovative driver assistance systems, such as:

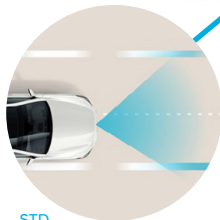

STD
Rear Occupant Alert (Ultrasonic optional)
 Monitors the rear seats to detect the movements of children and pets, reminding drivers to check the rear seats when exiting the vehicle.

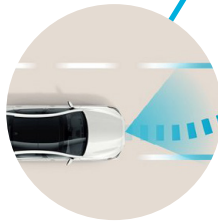

STD
Forward Collision-Avoidance Assist (with Pedestrian, Cyclist and Junction-Turning Detection)
 Pedestrian detection is standard and available junction-turning feature can detect an on-coming vehicle when turning left at an intersection.

STD
High Beam Assist
 Automatically switches high beams on and off at night for approaching vehicles.

STD
Driver Attention Warning
 Monitors driver-related characteristics to help detect driver fatigue.

STD
Lane Keeping Assist and Lane Following Assist
 Helps prevent accidental lane departure by sensing road markings and may automatically adjust steering to help center the vehicle in its lane of travel.

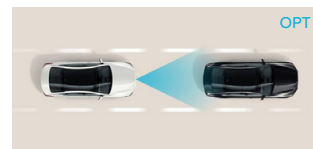

Safe Exit Warning

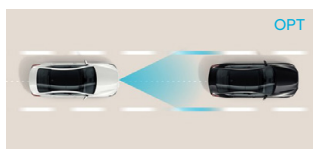

Blind-spot Collision Avoidance Assist

Remote Smart Parking Assist

Smart Cruise Control with Stop & Go

Highway Driving Assist

Blind Spot View Monitor

Rear Cross-Traffic Collision-Avoidance Assist

Surround View Monitor
