

Bringing New Intelligence to Connected Living

Using LG's advanced AI technology, you can control and monitor the status of your smart home appliances no matter where you are. The quick set up of LG's easy-to-use app gives you more convenience and freedom while on the go.

LG ThinQ® alert

LG ThinQ® App

The LG ThinQ® app is full of helpful features that help you get the most out of connected living.

- **Control Your Home From Anywhere:** The LG ThinQ® app gives you instant control over your smart home appliances from anywhere with an internet connection.
- **Check and Monitor Your Device:** Monitor and check your smart appliances whenever you need by simply connecting to Wi-Fi.
- **Smart Diagnostics:** Diagnose potential issues of your smart appliances by Wi-fi, NFC, and appliance sounds.

Helping You Work Smarter Not Harder

From being able to remote start and stop your laundry machine, to setting the temperature and kitchen timer associated to your oven, LG's innovative ThinQ® AI technology allows you to have complete control your appliances, giving you more time to spend doing what you love.

- **Easy Control:** Simplify home life with easy control over your smart home devices through the LG ThinQ® app and by voice command. The LG ThinQ® is compatible with Google Assistant and Amazon Alexa smart speakers.
- **Personalized Performance:** LG ThinQ® can learn your preferences to make relevant recommendations to answer your needs better.
- **Proactive Care:** Always feel confident knowing that your LG appliances are always performing at their best. Based on usage data, the LG ThinQ® can give you timely advice that helps prevent problems before they occur. Receive notifications through the ThinQ® app when it's time to change the water filter, when the oven should be cleaned and if there's too much detergent for a wash cycle.
- **Energy Efficiency:** LG ThinQ® can optimize product performance to minimize energy use and save you money.
