

## Ortho® Home Defense Max® BEDBUG Killer *Hotel Inspection Checklist*

**Tools: good flashlight and inspection card.**

1. Place all of your belongings in the bathroom on a tile surface.
2. Exhale gently across the top and sides of the headboard.
3. Pull back the bedding at both top corners of the bed to expose the mattress.
4. Using your flashlight, inspect the rolled seams at the top and bottom edges of the mattress at each corner looking for bed bugs, spotting, or cast skins.
5. Lift the mattress enough to observe the top corner of the box spring looking for the same signs as before for the mattress.
6. Look at the edge of the carpet and baseboard under the corners of the bed to inspect for spotting and cast skins. Put the corners back together.
7. Using your flashlight, inspect the top and edges of the headboard looking for any bed bugs that might have come out to investigate the CO2 from you breath.
8. Using your flashlight, inspect the skirting along the bottom of the bed looking for bed bugs, spotting and cast skins within the inside folds of the fabric.
9. Re-inspect the headboard again with your flashlight.
10. If there is a nightstand next to the bed, turn it upside down and inspect the back and bottom of the unit paying close attention to bed bugs or eggs that might have been laid in the head of screws or other openings in the wood.
11. Inspect the headboard again with your flashlight.
12. Use the inspection card and run it down behind the headboard looking for bed bugs or cast skins.
13. Inspect the portable luggage rack looking for signs of bed bugs.
14. If the luggage rack is attached to the wall, inspect closely the intersections of any wood/fabric joints or cracks along the wall.
