

## about Hanvon Production

Hanvon Production Co., Ltd., established on Dec. 28, 1998, is housed in a 8.7 hectare (21.4 acre) manufacturing compound, located in the IT Park of Yanjiao Economy Technology Development Zone, Hebei province, China. The facility primarily produces computer hardware and peripheral equipment. Hanvon Technology became a listed company in China in 2010.

As the manufacturing base of Hanvon Technology, the Hanvon Production facility covers over 30,000 square meters, and is believed to be the largest Writing Tablet plant in the world. After ten years of growth and expansion, the facility now has over 250 employees, an asset value over 60 million RMB, a highly developed infrastructure and a well-organized management system. In June 1999, the company was certified as a “Hi-tech Company” by Hebei province, and in January 2000, it was identified by the China Ministry of Technology as a “State Commercialized Hi-tech Product Manufacturing base.”

The company has passed ISO9000-2000 Quality System Certification.

Hanvon Production Co., Ltd is divided into ten departments: the Administration Department, Supplier Management & Purchasing, Production & Planning, Quality Control, Engineering, Logistic, Accounting, Molding & Fabrication, Finish Product Assembling, SMT Product, and Oversea Division.

The company owns and operates a wide range of sophisticated machinery for its manufacturing, including High Speed Component Placers, Wave Soldering machines, and Plastic Injection Molding Machines. Hanvon Production is also capable of conducting ultra-sounds and electronic testing, as well as instrument examinations at specialized facilities. The compound’s fully-integrated

infrastructure enables every step of production, from component purchasing, soldering, design molding, fabrication, plastic injection, painting, assembly, to packaging and delivery.

Currently, Hanvon Production mainly engages in the manufacturing of writing tablets, card scanners, fingerprint recorders and digital telephones. With an output capacity reaching 300,000 units per month, Hanvon has also become a major OEM supplier for other global technology brands, such as Lenovo, Haier, Tsinghua Tongfang, Handsome, and Greatwall.

At the end of 2004, the second phase of Hanvon's manufacturing compound was completed. The 120 million RMB project included the construction of a 20,000 square meter facility. This addition to Hanvon Production has tremendously increased manufacturing capacity, boosting annual revenues by 2.1 billion RMB.

Hanvon Production has won numerous awards from magazines, newspapers, and local governments, as well as several national honors, such as the "Top Ten Indigenous Enterprise Award," "Mayor Award of Lang Fang," and "Best Hi-tech Company Award." In 2004, Hanvon received a "AAA-class" credit rating from the Chinese government.

At Hanvon, we pursue the highest levels of perfection on every product we make. We honor the commitment to our customers to keep our products and services of utmost quality, and will continue to exceed expectations. Moreover, we will maintain our track record of growth through our pursuit to lead the electronics manufacturing industry. Hanvon Production's success make us the most trusted company among customers, employees and investors.
