

# FACING AFIB™

get serious about stroke

HELMUT HUBER & SUSAN LUCCI  
Program Ambassadors

When I found out the leading man in my life had **atrial fibrillation, or AFib**, I made a pledge to learn about the condition and to work with his doctor. AFib is a serious condition where a blood clot can form in the **heart** and travel to the **brain**, causing a **stroke**. More than **2 million Americans** are living with AFib, putting them at a nearly **five times greater risk of stroke**. The good news is this risk can be **significantly reduced**.
