

IGT Wins Systems Solutions Business at Station Casinos

Agreement includes 100-percent vendor-supplied IGT systems across all Station Casino properties, in addition to 406 MegaJackpots® Slot Games

LAS VEGAS – Sept. 25, 2013 – [International Game Technology](#) (NYSE: IGT) a global leader in gaming systems technology, today announced that Station Casinos has chosen IGT as its exclusive systems provider at all Station Casinos properties.

“We are proud of our long-standing history with IGT as we’ve shared many successes over the past three decades together. As we continue to enhance our technology and system solutions, we are once again turning to IGT for its innovative leadership to help us create a better connection with players.” said Dan Roy, Station Casinos Senior Vice President of Corporate Operations.

After Station Casinos conducted a thorough evaluation of its needs, they renewed their commitment to IGT’s Advantage® system. On top of the systems deal, IGT will also deliver 406 MegaJackpot® slot titles to Station Casinos in the coming year.

“IGT is excited to share this huge step forward in operating efficiency with Station Casinos to create a more dynamic and exciting environment for players,” said Eric Tom, IGT Executive Vice President of Global Sales. “Our systems are designed with the casino operator and player in mind, creating a more streamlined process for the operator and a greater game experience for players, and that is absolutely our laser focus for Station Casinos.”

In addition to being the exclusive systems provider, IGT will also provide Station Casinos with floor-wide Service Window technology, utilized through the Universal Game Adaptor (UGA) at the all-new Graton Resort & Casino in Northern California scheduled to open on November 5. This will enable the Service Window feature to be used across all capable EGM’s on the floor, allowing for direct marketing to players at any one of the 3,000-plus machines.
