

Be Prepared This Hurricane Season – Improve Your Coastline Home Health With The Sandy Solution

DELANCO, N.J., June 19, 2014 - National efforts to encourage hurricane preparedness focus on potential risk education, safety kits and supplies with very little attention paid to what Homeowners in at-risk areas can do to prevent devastating damage to their homes. [The Sandy Solution](#) offered by Danbro, a CHANCE® Foundation Expert, can help improve home health for coastal residents.

The Sandy Solution is a recently launched resource offered by a network of established foundation repair experts who are dedicated to providing additional resources and considerations for homeowners living along the Atlantic Coast.

For improved home health, important considerations include:

- Evaluative home foundation assessment by an expert
- Develop a plan of repair with a professional engineer or architect
- Ensure that your elevated foundation support system includes helical piles that are engineered to withstand future storm surge
- Protect against corrosion by using galvanized piles
- Hire a specialty home elevation contractor that is properly insured
- Ensure that your helical pile installer can provide a manufacturer's warranty

According to the NOAA Weather Service recent 2014 Atlantic Hurricane Season Outlook, there is a 70% probability for 8-13 Tropical Storms, 3-6 Hurricanes and 1-2 Major Hurricanes for the upcoming Atlantic Hurricane Season. To avoid devastating impact in 2014, foundation repair experts are urging coastal residents to consider improving at-risk homes with more permanent solutions.

Properly preparing for Hurricane Season (June 1st – November 30th) means improving your chances of avoiding disaster. Visit www.thesandysolution.com to learn more about the benefits of helical pile technology or call 855-477-2121 to speak with a customer support specialist about the simple way to prevent, restore and elevate a flood affected structure with a raised foundation system.
