Company

Ecolean, established in 1996, is a privately-owned global packaging company with its head office in Helsingborg, Sweden. Ecolean develops and manufactures packaging material, packages and filling machines for the liquid food industry.

Business concept

Ecolean develops and manufactures packaging systems for the liquid food industry – packaging material, packaging, and filling machines. By using a minimal amount of raw material we create a lightweight package which combines low environmental impact with consumer convenience. Ecolean currently has two packaging systems, one for refrigerated distribution and an aseptic packaging system for products that do not require refrigerated distribution or storage.

Product and production concept

The Ecolean® lightweight package stands up and out on the shelf with its unique shape and excellent print quality. It is easy to open, pour and drink from and generates less waste volume. The package is made from a thin film that takes only a little amount of raw material and less resources to be produced. The material is part plastic (PE and PP) and part chalk (40 % by weight)- one of nature's own material. The Ecolean lightweight concept means saving resources which leads to a low environmental impact. Ecolean packaging material and packages are manufactured and printed in Ecolean factories. The hygienic, hermetically pre-sealed packages are delivered on reels to the producer's factory. Ecolean offers packaging solutions for ambient and chilled distribution. The Ecolean packages for ambient distribution are pre-sterilised in Ecolean factories which reduces the complexity of operating an aseptic packaging plant and increases the robustness of the total system.

Ecolean develops and manufactures innovative packaging systems for the dairy and liquid food industry. Ecolean's modern lightweight packaging is consumer convenience and environmental concern in one. Ecolean is a global company with headquarters in Sweden. Founded in 1996, it has commercial activities in more than 30 countries China, Pakistan and Russia being the largest markets. Ecolean has 260 employees.
