

AirMini: Patient Testimonial Quotes & Medical Claim Sources

What patients are saying about AirMini:

“As a healthcare professional and a person with sleep apnea I am in love with the AirMini. Traveling with my CPAP machine has been a hassle, not to mention the extra weight the machine weights. I look forward to being able to carry my AirMini in my purse. I cannot wait until I am able to purchase the machine from my durable medical provider.”

–Vickie B., Green Bay, Wisconsin

“There was little maintenance; just snap it on and you’re good to go. And the ease of use with the [HumidAir™] waterless humidification piece, versus pouring the water in and cleaning it out – that was the cat’s meow.”

–Vickie B., Green Bay, Wisconsin

“I love how compact it was; that’s so nice – the size of an eyeglass case. To hook up the hose was very easy, too; I put together like ‘ba-da-boom, ba-da-bing’; it was done.”

–Jeffrey Cappello, Avon, New York

“The AirMini was a great benefit while I was traveling. The comfort of not having to pack up my home machine each time I would leave at 4:30 in the morning was a huge relief. I was able to have it packed the night prior and just heading out for a few days’ travel, and being small enough to fit in my backpack as opposed to having to carry a small case around was pleasing as well. I will be sure to obtain one when they come to market.”

–Brian Medeiros, Eldred, Pennsylvania

“I love the AirMini! It is very small and easy to use. Plus I really like the feature where you just put the mask on and it turns on. That was very cool. Sleep apnea will not stop me from traveling, whether it is a quick weekend trip or a visit in another country, and products like the AirMini make that possible for me!”

–Dustin Martzke, Shawano, Wisconsin

HMEs are talking about it, too!

“There is huge demand for a CPAP that’s easier to travel with. Not only have my patients asked me for it, they already trust the therapy they get from ResMed, so I know AirMini is going to be hugely popular. It’ll benefit my traveling patients as well as our business.”

–Samantha Romsos, respiratory therapist at HME Home Medical in Green Bay, Wisconsin
