

The number of new U.S. cancer cases is predicted to rise:
1.7 million in 2015
to 2.4 million in 2035.

90%

of cancer deaths
are a result of
metastatic disease.

Cancer is the
No. 1 cause of
disease-related death
among U.S. children.

Almost 70 percent of
U.S. cancer cases are
diagnosed in people
age 55 and older.
