

Welcome to the next gen network.

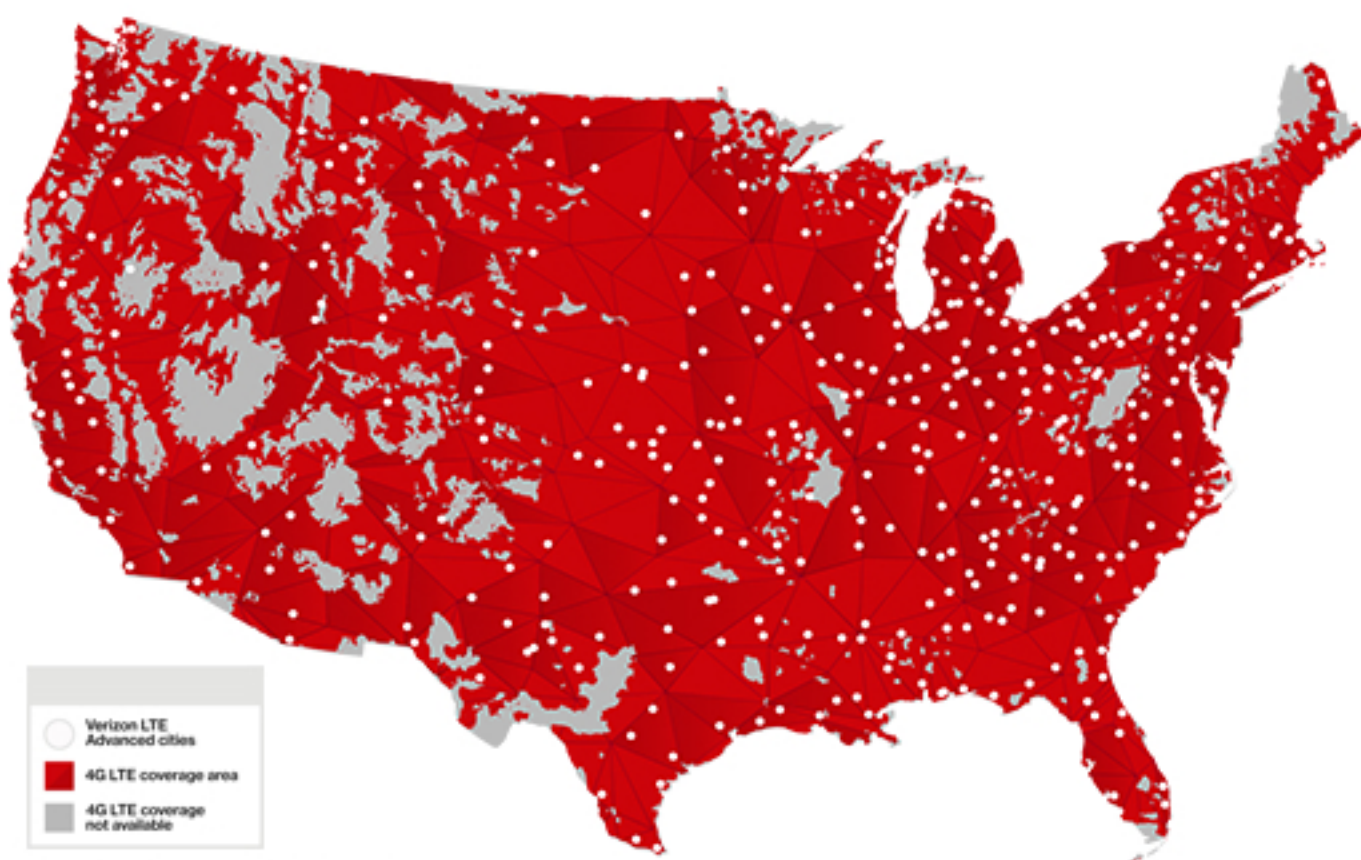

LTE Advanced is ready for you.

2003: first to introduce 3G and rolled it out nationally by 2005
2010: first to launch 4G LTE across the country
2014: a better network with XLTE, tripling capacity

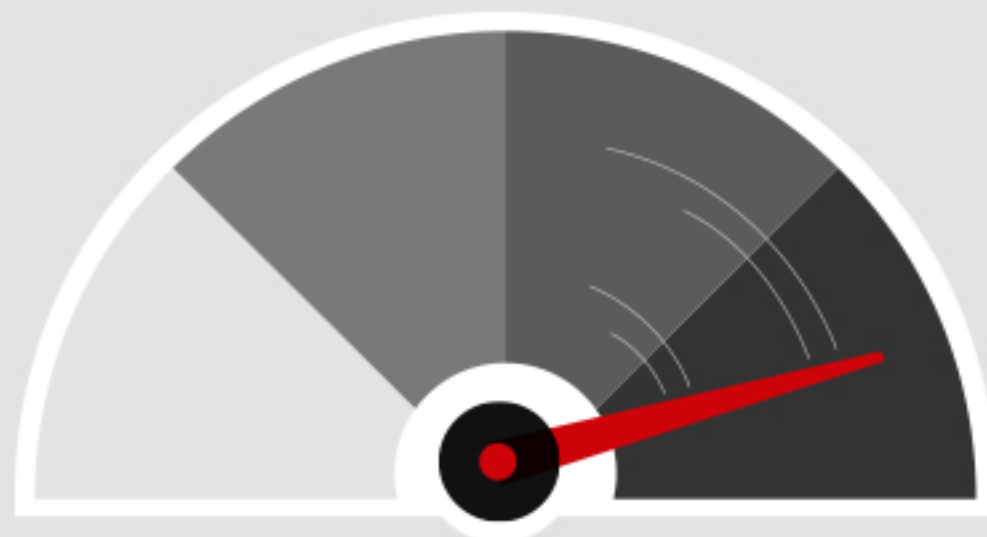

Now: Verizon LTE Advanced, powering America's largest and fastest 4G LTE network ever.

461 cities

covered from coast to coast.

As of August 29, 2016

50% faster peak speeds.

Experience next gen speed for video streaming, large downloads and more.

39 phones & tablets are compatible.

You only need a compatible phone or tablet with the latest software update.

Don't have one? Add or upgrade your smartphone or tablet and start experiencing faster speeds.

Better Matters.

Claims don't matter, but facts do. The facts: Verizon is consistently ranked #1 in industry awards and performance metrics in categories including speed, reliability, data, call, text and overall performance. Now with Verizon LTE Advanced, we are again delivering a better network for our customers.
