

veterinarian tested

"The results provide evidence of effectiveness in reducing anxiety induced by the presence of noise."

Gary Landsberg
BSc, DVM, DACVB, DECAWBM

"A majority of dogs appeared significantly calmer in post-treatment observation in a stressful environment"

Christopher Pachel
DVM, DACVB

"I'm thrilled that there's finally a drug-free solution to some of the most common behavioral problems, anxiety, fear and stress, affecting millions of our dogs."

Jeff Werber
DVM

Chief of Staff, Century Veterinary Group, Los Angeles, CA

non-invasive
no Rx required

What is the calmz® anxiety relief system?

Calmz is a non-invasive, drug free therapeutic delivery system using Neurosync Technology.

The two-part system consists of a comfort fit vest and the calmz device.

The comfort fit vest is specifically designed to hold the calmz device over key accupressure points on the dog's spine.

During a stress event, there is a decrease in blood flow to the brain as the dogs' adrenaline and anxiety increase. By placing the device over the key accupressure points located on the spine, the blood flow is restored to the brain allowing for normal neural firing, which helps reduce anxiety.

neurosync™ technology

calmz®
by Petmate

What is neurosync technology®?

Neurosync technology is our patent pending blend of classical music and tones. The vibration from the calmz device provides a massaging sensation when placed on accupressure points along the spine.

The special blend of classical music and tonal therapy vibrations that your dog can hear and feel reduce anxiety and associated unwanted behavior in your dog.

The calmz system provides clinically proven relief to dogs suffering from anxiety.
