### **BILLY GOAT'S NEXT GEN DEBRIS LOADER SERIES OFFERS INCREASED DURABILITY AND LONGER LIFE IN THE NEW LINE-UP**

**LEE'S SUMMIT, Mo. (October 16, 2019)** - The new Billy Goat® Next Gen Debris Loaders feature a square 10 gauge steel discharge chute that not only spreads to load, but also has a 63% thicker back plate for added durability, extended life and ease of service. Additionally, the poly housing liner features a non-counter sunk bolt pattern that has equal to or better life compared to quarter-inch steel liners in accelerated testing. These composite liners won't cause secondary failures to engine shafts like a failed steel liner may.

The 13.0 – 37.0\* gross hp truck loaders offer Billy Goat's exclusive dual shredding system with Piranha™ blade for extra shredding and best debris reduction, maximizing trailer loading across multiple properties, saving time and dump fees.

Electric start is featured on the 14\*\*, 18, 29 and 37 gross hp models, with Vanguard® EFI† power on the 37 gross hp loader — the only Vanguard® EFI powered unit on the market. EFI delivers easy automotive-type cold weather starting as well as fuel savings up to 25 percent over carbureted equivalents†.

From small or mid-size to large commercial and municipal jobs, Billy Goat's Next Gen Debris Loaders offer a wide range of solutions. And with optional Customfit™ features for mounting, every contractor can opt for an integrated solution that fits their business need!

For clean-up suction power and optimized truck loading second to none, see the complete line of Next Gen Debris Loaders at [www.billygoat.com](http://www.billygoat.com).

*\* All power levels are stated gross horsepower at 3600 RPM per SAEJ1940 as rated by Briggs & Stratton®.*

*\*\*Power rated by engine manufacturer.*

*† Closed-loop EFI system fuel savings may vary based on debris loading conditions and other factors.*

#### **About Billy Goat Industries:**
