

COMPARING PLANS CAN SAVE YOU MONEY

REVIEW YOUR OPTIONS
AT [MEDICARE.GOV](https://www.Medicare.gov)

Medicare Open Enrollment is here.

This year, Medicare plans have historically low premiums—dropping an average of 34% over the last 3 years, and in some states dropping over 50%. Now's the time to review your coverage options.

Why compare plans for next year?

Just as your health care needs change, so do Medicare plans. Don't assume your current coverage is still your best choice. Look at your current plan, costs, and health needs, then go to [Medicare.gov/plan-compare](https://www.Medicare.gov/plan-compare) to compare plans. You may find new extra benefits, save money, or both.

And don't forget, the flu shot is covered by Medicare.

Many people with Medicare are older Americans, and therefore they're at a greater risk for serious complications from flu. A flu shot is your best protection from getting and spreading the flu, and it's covered by Medicare plans at no cost to you when furnished by an in-network provider. Protect yourself and others. Visit your doctor, pharmacy, or other local providers to get a flu shot today.

MEDICARE OPEN ENROLLMENT *Oct. 15 – Dec. 7*

Compare plans from the safety of your home.

Find plans at and get estimates for all your prescriptions on [Medicare.gov](https://www.Medicare.gov). If your current coverage still meets your needs, then you don't have to do anything.

Save on insulin with Medicare.

Starting January 1, 2021, you may be able to save on the cost of insulin. Hundreds of 2021 Medicare drug plans will offer a month's supply of a broad range of insulin products for only \$35 copay or less. You could save an average of \$446 per year on out-of-pocket costs for insulin. Visit [Medicare.gov/plan-compare](https://www.Medicare.gov/plan-compare) to look for plans with new insulin savings.
