

Product Name: LG Styler (S3RFBN), LG Styler White (S3WFBN) & LG Styler Mirror (S3MFBN)

Canadian Price and Availability: Available at select LG retailers across Canada. Check Lg.ca for MSRP pricing and available retail locations. Check your local retailer for pricing.

Revolutionize the way you care for your clothes

The LG Styler clothing care system is part of the ultimate laundry room and does not require a water hookup. Simply fill up the removable water reservoir and go. This steam clothing care system reduces wrinkles, refreshes, dries, and sanitizes through the power of LG TrueSteam® technology.

LG TrueSteam®

The LG Styler is a wi-fi enabled clothing care system that uses LG TrueSteam™ technology to help refresh, de-wrinkle, gentle dry and sanitize your garments in a number of timed cycles.

- Steam along with gently moving hangers reduce wrinkles to extend wear between dry cleanings. The low temperature drying system dries clothing and delicates faster than on a standard drying rack.

- LG TrueSteam® technology reduces odours, such as smoke, sweat and food, that cling to fabrics, knitwear, and delicates.
- The Sanitary cycle powered by TrueSteam® can reduce more than 99% of viruses and bacteria in clothes, bedding, sportswear—even your children's plush toys. LG Styler can help sanitize the fabrics in your home easily.

Asthma and Allergy Friendly® Certification

- The LG Styler has earned the Asthma & Allergy Friendly® certification from Asthma Canada and Allergy Standards Ltd.

LG ThinQ® AI Innovation

- LG ThinQ® enabled, means the LG Styler can be started or monitored any place, any time using a smartphone. You can know when the cycle is finished, download new cycles, quickly troubleshoot minor issues, and check energy usage.
