

# THE INFORMATION, MOTIVATION AND BEHAVIOURAL SKILLS MODEL FOR CHRONIC DISEASES

is a behavioural science concept that has been studied in diabetes self-management.<sup>1-2</sup>

## INFORMATION

People with diabetes require actionable information to support effective self-management. This information should be relevant to behaviour and easy to translate into diabetes self-management action.

## MOTIVATION

People with diabetes need to be motivated to act on information. Motivations can be personal, related to what they think will happen if they take self-management action, or social, due to the support or resistance from friends or family.

## BEHAVIOURAL SKILLS

Individuals with diabetes need to have the skills to enable them to undertake diabetes self-management actions. These skills include knowing how to test, knowing how to understand blood glucose values and knowing how to change diet or count carbs.

**STUDIES HAVE SHOWN THAT THE PRESENCE OF ALL THREE ELEMENTS MAY HELP PEOPLE WITH DIABETES**

to optimise their blood glucose testing and improve self-management actions.<sup>1-2</sup>

# NEW FEATURES OF THE CONTOUR® DIABETES APP

## WHAT'S NEW IN THE CONTOUR® DIABETES APP?

- **My Patterns** – the app identifies patterns and trends in blood glucose readings and prompts users of the possible causes
- **Test Reminder Plans** – helps users to optimise their blood glucose testing
- **View Insulin and Carbs** – users can view their insulin doses and carb intake in one simple view alongside their blood glucose readings, to see how they correlate
- **Reporting** – users can view data in an easy-to-read Blood Sugar Diary that includes 1, 2, 4 or 12 weeks of blood glucose values, carbs and insulin, enabling more informed discussions with healthcare professionals
- **Data Export** - Data can be exported as a CSV file that can be viewed on multiple platforms

DIFFERENT  
PATTERNS

**11**  
TEST  
REMINDER  
PLANS

## NEW TEST REMINDER PLANS CAN:

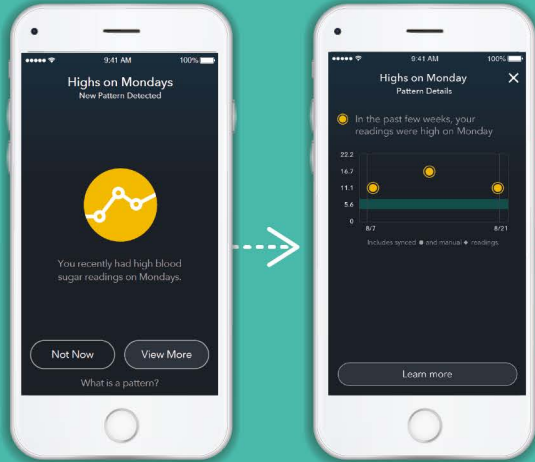

- Optimise testing to provide results that give a more comprehensive overview of blood glucose patterns
- Help people with diabetes learn how diet, activities and medications affect blood glucose levels, and provide opportunities to make changes
- Enable people with diabetes to choose a testing schedule that suits them

# THE 'MY PATTERNS' FEATURE EXPLAINED

## RECEIVE NOTIFICATIONS

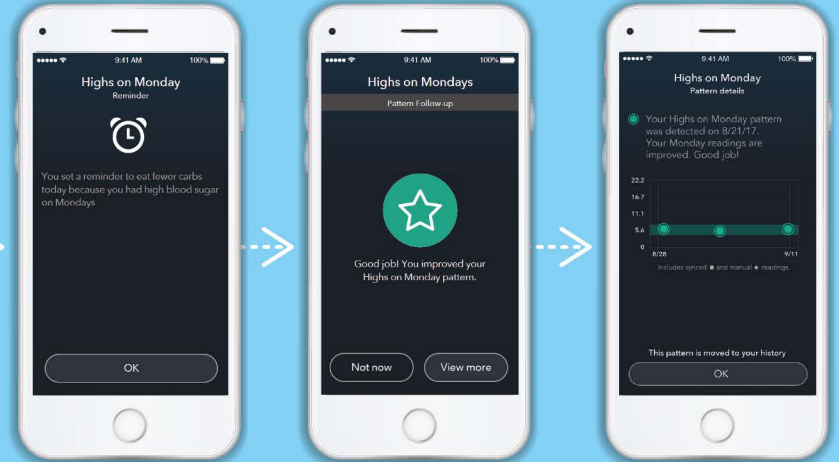

## LEARN ABOUT POSSIBLE CAUSES

## SET REMINDERS

## TAKE ACTION AND TRACK PROGRESS

1. The app analyses results received from the meter and notifies users of sub-optimal patterns in their blood glucose readings

2. The app prompts users about the possible causes of the pattern

3. Users can set reminders to help improve sub-optimal blood glucose patterns

4. Alerts on the app will remind users to take action

5. The app will track their progress to see if the pattern improves over time
